NEW

## PRODUCT RELEASE

### 9" Threaded Cap Ported or Non-Ported

#### Features:

- Cap and gasket may be utilized in applications where chemical contact is approved with known chemical resistivity data for the materials specified below.
- Rated for maximum internal pressure of 15 PSI.
  - Applications requiring pressure leak or pressure loss testing.
  - UN regulated tanks, totes and IBC products.
- Furnished with a gasket.
  - Santoprene grade 55 durometer gasket is standard.
  - Viton 75-80 gasket is optional.
- Available with no top port or single top port, either with 2" FPT threads/ or 2.5-5 modified buttress threads.
- Manufactured from HDPE:
  - Resin meets FDA 21 CFR 177.1520, ASTM D4976 – PE 233 and UL94HB specifications.
- Maximum torque for tightening is 75 ft. lbs. (*note: pressure rating and tightening torque specification is dependent upon mating male thread fit up and quality*).
- Black in color.

9" Cap without Port

9" Cap with 2" FPT Port

9" Cap with Buttress Port

#### Specifications:

- Shipping weight of Cap and Gasket assembly is 2 lb.
