PRODUCT RELEASE

Reverse Liquid Level Sight Gauge Kit

DW2000-102 Shown Below with 14988

Features:

- Kit is designed for Dualline™ tanks where actual liquid levels are not normally visible.
- Two kits are offered:
 - Small Gauge Kit (14987) for tank capacities of 1500 gallons and less.
 - Large Gauge Kit (14988) for tank capacities of 2000 gallons and larger.
- Gauge works in reverse order - when tank is full the level indicator is at bottom of sight tube and conversely when tank is empty the level indicator will be at top of the sight tube.
- Product is manufactured from PVC tubing, polypropylene rope and stainless steel hardware.
- Kits are intended to be field installed by the dealer or user in Dualline™ tanks.
- Kits are for liquid level approximation only, not intended for precise metering applications.

Specifications:

- Shipping carton dimensions and weight:
 - 24" long x 13" wide x 8" high
 - Weight of either kit is 15 lbs.
- *Kits do not include PVC tubing to house the internal float and external indicator - material may be locally sourced.*

Example kitted components
in shipping carton.
